Summary of Qualifications

Over 25 years of experience managing safety and health for various projects. Successfully implemented numerous nationally and internationally accepted safety management systems involving multiple training programs, inspection tools and accident investigation methods. Proven ability to problem-solve issues in a "hands-on" personable manner. One of the only safety professionals internationally who holds the Canadian Registered Safety Professionals designation (CRSP) from the board of Canadian Registered Safety Professionals, the Certified Health and Safety Consultant designation (CHSC) and the international Certified Safety Professionals (CSP) designation with the Board of Certified Safety Professionals. I am also a Certified Safety and Health Professional (CSHP) in the State of Hawaii and can save your business money through rebates on your Worker's Compensation premium. I have assisted numerous companies successfully pass Workwell, COR and other Government compliance audits.

Relevant Experience

August 1999 to Present

Raising the Standard Consulting /USA Inc. – Hawaii / Canada

Founder and CEO

I manage all aspects of leadership, sales, recruitment, marketing, program development, training, strategic planning and quality control for this vibrant Health & Safety Consulting Firm. The firm has a core of seasoned professionals and associate consultants across Canada and the United States. I have been involved in projects with a wide range of industries including, mining, healthcare, manufacturing, construction, pharmaceutical, and Federal, to name a few. Construction specific activities provided for a wide range of clients such as Nordic PCL, Nan Inc., Watts Constructors, Remington Home Builders and Trillium Masonry to international projects for Lafarge North America (highway and street construction) and Lilja Corporation (furnace installation and maintenance) included:

- Develop and deliver government approved certification training for safety representatives.
- Provide accident investigation and regulatory citation assistance.
- Provide on-site, full and part-time Site Safety and Health Officers (SSHO) on Federal, State, Provincial and private projects.
- Responsible for the development and implementation of new services for clients, to include training programs, maturing safety programs, assessments, trending, ethics and gap analysis.
- Anticipate, identify and evaluate hazardous conditions and practices. Develop hazard control designs, methods, procedures and programs. Implement, administer and advise others on hazard controls and hazard control programs.
- Measure, audit and evaluate the effectiveness of hazard controls and hazard control programs.
- Provide training and multi-site safety management coverage.
- Contracts consisted of all phases of construction and involved trenching, crane safety, rigging, steel erection, electrical, mechanical, lockout, scaffold, fall protection, confined space, etc.

Liquid Robotics – Honolulu, Hawaii

Safety Consultant

Stanford R. Brown, B.Sc., CSP, CSHP, CRSP, CHSC

Email: sbrown@rtsconsulting.com Phone: 808-426-3464

7 Waterfront Plaza, 500 Ala Moana Blvd., Ste. 400, Honolulu, HI 96813

In January 2009, long endurance testing began when a Wave Glider completed a nine-day circumnavigation of Hawai'i's Big Island. Later that year, a pair of Wave Gliders journeyed from Hawai'i to San Diego, an 82-day trip that covered more than 2,500 miles. Since then, Wave Gliders have covered over 250,000 nautical miles, and collected data for dozens of scientific, commercial and security applications. Liquid Robotics early customers included leading oceanographic institutions, the Navy, NOAA and major commercial organizations. In 2010, Bill Vass – a leading IT expert and former President of Sun Federal - discovered Liquid Robotics and immediately recognized the potential to build a world class data services business based around the ground breaking technology. With a new investment from Vantage Point and Schlumberger in hand, the company brought Bill on board as CEO in April of 2011 and launched the present company – the first global ocean robot data services company. I provided a Mock OSHA Audit for this innovative company.

September 2012- November 2012

SAH – Honolulu, Hawaii

Alternate Site Safety and Health Officer

Provided SSHO for SAH Hawaii, a growing general construction company.

August 2012

Provided the necessary services and materials to fabricate one each, fully portable MH equipment consisting of a steel material transport system which uses carts to transport material across bridges from the port and starboard sides of the dry dock and a crane enclosure which is positioned over the hatch of a SSN 774 Class submarine. Crane(s) within the enclosure facilitates the transfer of material from the transport system through the submarine hatch.

Stanford R. Brown, B.Sc., CSP, CSHP, CRSP, CHSC

Email: sbrown@rtsconsulting.com Phone: 808-426-3464

7 Waterfront Plaza, 500 Ala Moana Blvd., Ste. 400, Honolulu, HI 96813

January 2012 & April 2014

Lorman Education Services – Honolulu, Hawaii

Trainer

Trained the skills an individual needs to guard against workers' compensation related costs and risks and learned how to minimize future workers' compensation costs and avoid legal hassles with best practices from top experts in the field. Taught to:

- Handle return-to-work issues with ease
- Tips on communicating with the health care professional
- Find out what you need to know about hazard assessments
- Understand key Occupational Health and Safety Act issues

December 2011 – January 2012

Kiewit – Honolulu, Hawaii

Alternate Site Safety and Health Officer

I was the official Site Safety Health Officer for the \$32.2 million Pohakuloa Base project. Kiewit's ethical, forward-thinking workforce continues to build upon the company's reputation of safe, high-quality engineering. Consistently ranked among the top five of the *Engineering News-Record* Top 400 Contractors, their company is a leader in a variety of market sectors throughout North America and, most recently, Australia.

December 2011- January 2012

Walsh Construction – Honolulu, Hawaii

Alternate Site Safety and Health Officer

I was the SSHO for the Ford Island Project, which The [U.S. Navy](#) has begun. It is an \$84 million construction project that will make Ford Island the center of Pearl Harbor Naval Base operations. The infrastructure phase will employ about 250 construction workers and could provide a peak local work force of up to 400. It also will restore the island's time-worn infrastructure to its former glory with the added benefit of modern technology. The work involves installing new electrical and telecommunications systems as well as major improvements to the sewer system and roadways

December 2011

KIUC - Kapaia Power Station – Honolulu, Hawaii

Safety Consultant

Supervised and trained the workers of IST's Once Through Steam Generator (OTSG), which is highly efficient in recovering our gas turbine's exhaust heat in the form of super-heated steam. The steam is injected back into the gas turbine in two ways; first, adding mass flow to the combustor which increases MW output without burning additional fuel, and secondly, into the fuel nozzles which greatly reduces NOx emissions and demand on the plant's SCR system.

July 2011

Glads Tree Trimming—Honolulu, Hawaii

Alternate Site Safety and Health Officer

Provided the On-Site SSHO for the I-225 Rail Line which is a Design-Build project to construct 10.5 miles of Light Rail corridor. 5 miles of the Light Rail will run along I-225 and the remainder will run along local streets. There are 7 bridges, 7 grade crossings, and 8 stations in the 9 mile stretch from Iliff to the tie-in point of Peoria Station. Rail valued at \$1,000,000.

June 2011 to December 2011

General Trades & Services Inc. ("GTS") – Honolulu, Hawaii

Alternate Safety Manager and Occasional Site Safety and Health Officer (SSHO)

Stanford R. Brown, B.Sc., CSP, CSHP, CRSP, CHSC

Email: sbrown@rtsconsulting.com Phone: 808-426-3464

7 Waterfront Plaza, 500 Ala Moana Blvd., Ste. 400, Honolulu, HI 96813

KAENA POINT Water Tank Repair (WTR) and Drainage Repair (DR) involving performing the drainage improvements and the repair of two above ground welded steel water tanks. Duties provided included:

- a. Evaluate client's existing safety plan and edit/augment said plan as Consultant deems advisable.
- b. Provide training with respect to safety issues to Client's employees as Consultant deems advisable.
- c. Provide site specific written plans as Consultant deems advisable.

Risk Control Consultant / (SSHO)

As a Risk Control Consultant I am responsible for the following duties:

- Maintain and enforce clients' Voluntary Protection Program (VPP) Star Status health and safety program for Honolulu Builders on their Kunia expansion project for Monsanto. Project Safety Person of a 20+ million dollar warehouse and farm process equipment project. The contract consisted of all phases of construction and included trenching, crane safety, rigging, steel erection, electrical, mechanical, lockout, scaffold, fall protection, confined space, etc. The project had as many as 60 tradesmen on site at any given time. I generated a positive effect on every single worker on site allowing them to be more safety conscious;
- Gather, assess, and organize information on clients' health and safety problems and issues;
- Conduct on-site observation to ascertain unit functions, work performed, and methods, equipment, and personnel used;
- Analyze data gathered and develop solutions or alternative methods of proceeding;
- Identify accident causes and help clients determine how such accidents might be prevented in the future;
- Evaluate workplace environments, equipment, and practices, in order to recommend compliance with safety standards and government regulations;
- Conduct safety training sessions and education programs to management, and demonstrate the use of safety equipment;
- Confer with clients concerned to ensure successful functioning of newly implemented systems or procedures;
- Recommend measures to help protect client's personnel from potentially hazardous work methods, processes, or materials;
- Recommend and assist the clients in the implementation of health & safety solutions in order to help them reduce their expenses related to workplace injuries and illness and thus enhance profitability;

Non-Construction Employment

November 1998 to August 1999

Education Safety Association of Ontario – Toronto, Ontario

Field Consultant – South Central

I was responsible for servicing the Museums, Universities, Colleges, Libraries, Schools and Art Galleries in the Greater Toronto Area. I assisted the education sector in reducing workplace injuries and illnesses through activities such as Certification training, audits, health and safety program development and quantitative measurements of air quality, noise and vibration.

June 1998 to November 1998:

Health Care Health and Safety Association – Toronto, Ontario

Project Team Leader

Reporting to the Executive Director/CEO, I was responsible for organizing and managing my division and establishing procedures to meet the Health Care Health and Safety Association's objectives. I coordinate and monitor the delivery of Health Care Health and Safety training programs and consulting services of my division. I was a liaison with senior managers in the health care sector. I acted as a team leader by directing and advising Consultants and Associate Consultants on a project-by-project basis to ensure they meet the needs of the Health Care Health and Safety Association's clients. I also performed consulting duties as required to utilize my area of experience within any one of the divisions of the Association. I assisted the Executive Director/CEO in the hiring, training and managing of Consultants and Associate Consultants. I was responsible for meeting with trade and professional associations and other groups to discuss the health and safety needs of my division and to promote the services offered by the Health Care Health and Safety Association. I also assisted the Executive Director/CEO and Board of Directors in strategic and operational planning. My responsibilities spanned throughout the province, and included all long term care facilities.

July 1995-June 1998:

Boart Longyear Inc. - Mississauga, Ontario

Safety & Personnel Administrator (Mississauga & Sudbury facilities)

I was responsible for assisting in the investigation of all work related incidences, including lost-time injuries, medical aids, first-aids, near-misses and accidents involving property damage. I conducted regular inspections of the steel manufacturing plants, all geo-technical and a number of mining projects. I also administered and monitored all Workplace Safety and Insurance Board claims, acted as the company's representative for appeals and ensured compliance of the Occupational Health & Safety Act and all environmental regulations. I conducted and/or analyzed all industrial hygiene monitoring. I was responsible for the development and implementation of all environmental, health & safety programs. I successfully conducted training needs analysis and provided training programs for all plant and management staff. I developed and administered all Human Resource procedures and programs and conducted investigations regarding all matters related to Human Resources.

May 1993-July 1995:

Xerox Canada Inc. - Oakville, Ontario

Environment, Health & Safety Technical Advisor

I successfully developed and implemented policies and procedures regarding numerous factors of the environment, health & safety program using the International Safety Rating System. Some of these developments included: evacuation procedures, fire/property protection procedures, lock-out procedures, safe job procedures, plant/management safety training analysis and scheduling, Joint Health & Safety Committee training and reorganization and safe work/fire permits and policies. I also analyzed work incidents and their causes, recommended corrective actions and followed these through to completion. Individually and as advisor of the Joint Health & Safety Committee, I identified unsafe working conditions and prepared technical reports for unsafe equipment and processes. I updated and organized all Material Safety Data Sheets and completed general and specific workplace WHMIS training. I was the official company representative in all communications with Government agencies regarding environment, health & safety matters.

7 Waterfront Plaza, 500 Ala Moana Blvd., Ste. 400, Honolulu, HI 96813

March 1992-May 1993

Xerox Canada Inc. - Oakville, Ontario

Safety Specialist

Consultant work involving the enforcement and development of environment, health and safety standards during the construction of the second phase of Line #1. I conducted inspections, incident investigations and reported on substandard conditions. I was also the liaison for all permitting and approvals between Xerox and various agencies during the construction project. I conducted hazard analysis operability studies (HAZOPS) and made recommendations based on my findings.

June 1990-June 1991:

Shopsy's Foods - Weston, Ontario

Div. Of Thomas J. Lipton Inc.

Safety & Loss Control Coordinator

Implementation of a unique two-stage fire evacuation plan. I directed and controlled all fire protection activities, supervised site security operations and coordinated activities of contract security staff. I designed a safety training program to promote, motivate and facilitate safe work practices by all office and plant employees.
